

Registration Fees calculation for saloon vehicles listed below should be ignored. The registration fee is now €150.

**Calculation of Registration Tax and Road Tax
for Saloon Type, Motor Vehicles**

Registration tax and road tax for saloon type, motor vehicles are calculated based on the following tables:

1. Initial calculation of registration tax and road tax for saloon type, petrol or diesel motor vehicles, based on engine cubic capacity, according to Table 1.

Table 1

Motor vehicle with engine of cubic capacity C (cc):	Registration Tax	Annual Road Tax
	€ cents per engine cubic centimeter (cc)	€ cents per engine cubic centimeter (cc)
C ≤ 1450 cc	0.17086	0.04272
1450 cc < C ≤ 1650 cc	0.25629	0.05980
1650 cc < C ≤ 2050 cc	0.42715	0.11960
2050 cc < C ≤ 2250 cc	0.51258	0.14523
2250 cc < C ≤ 2650 cc	1.02516	0.19649
2650 cc < C	1.02516	0.19649

2. Adjustment of initial registration tax and road tax for saloon type, petrol or diesel motor vehicles, based on engine CO₂ emissions (combined cycle), according to Table 2.

Table 2

Mass (M) of CO ₂ emissions (combined cycle) in grams per kilometer traveled (gr/km) -	Adjustment of registration tax and road tax
M ≤ 120 (gr/km)	Less 30%
120 (gr/km) < M ≤ 165 (gr/km)	Less 20%
165 (gr/km) < M ≤ 200 (gr/km)	Less 10%
200 (gr/km) < M ≤ 250 (gr/km)	Plus 10 %
250 (gr/km) < M	Plus 20 %

3. Adjustment of initial calculation of registration tax and road tax for saloon type, petrol or diesel motor vehicles, based on engine cubic capacity (for motor vehicles with a Certificate Of Conformity from an EU member state), according to Table 3.

Table 3

Motor vehicle with an engine of cubic capacity C (cc):	Adjustment of registration tax and road tax
C ≤ 1450 cc	Less 30%
1450 cc < C ≤ 1650 cc	Less 25%
1650 cc < C ≤ 2050 cc	Less 20%
2050 cc < C ≤ 2250 cc	Less 15%
2250 cc < C ≤ 2650 cc	Less 10%
2650 cc < C	Less 5%

3. Registration tax and road tax for other categories of motor vehicles.

Table 4

Vehicle	Registration Tax	Road Tax
Dual mode vehicles	50 % of the registration tax of a vehicle with an engine of equivalent cubic capacity	50 % of the road tax of a vehicle with an engine of equivalent cubic capacity
Motor vehicles other than those with petrol or diesel engines or dual-mode vehicles	€85	€17
Light duty Van	Calculated as for a saloon type vehicle of the same engine capacity and emissions, with maximum payable registration tax €598	Calculated as for a saloon type vehicle of the same engine capacity and emissions, with maximum payable road tax €299

Example 1: Motor vehicle with a petrol engine of cubic capacity 1998 cc, CO₂ emissions - 210 gr/km, registered new in a European Union member state, imported in the Republic.

Registration Tax	Table 1	1998 x 0.42715 =	€853,4457
	Table 2	+ 10 %	<u>+€85.34457</u>
			€938.790
	Table 3	- 20 %	<u>-€187.758</u>
	Total		€751.032
Road Tax	Table 1	1998 x 0.11960 =	€238.9608
	Table 2	+ 10 %	<u>+€23.89608</u>
			€262.85688
	Table 3	- 20 %	<u>-€52.571376</u>
	Total		€210.2855

Example 2: Dual-mode vehicle with an engine of cubic capacity 1998 cc, CO₂ emissions - 210 gr/km, registered new in a European Union member state, imported in the Republic.

Registration Tax	As calculated in Example 1		€751.032
	Table 4	- 50 %	<u>- €375.516</u>
	Total		€375.516
Road Tax	As calculated in Example 1		€210.2855
	Table 4	- 50 %	<u>- €105.14275</u>
	Total		€105.14275

Example 3: Electric vehicle.

Registration Tax	Table 4	€85
Road Tax	Table 4	€17
